

## T300 TAR REMOVER

This product is ideal for many applications where other solvents are restricted. It is a highly versatile and effective degreaser specially designed to remove tar and bitumen deposits from heavy equipment and vehicles. This solvent-based degreaser will soften and completely dissolve heavy grease deposits.

Its biodegradable surfactants and emulsifiers allow this degreaser to be rinsed freely with hot water. It will not freeze.

### **DIRECTIONS**

For heavy deposits of tar or grease, apply at full strength with a pressure sprayer or brush. Wait 5 minutes before rinsing with hot water or steam.

For lighter degreasing operations, dilute 1 : 1 with kerosene.

In all applications, rinse well with hot water..

**FOR COMMERCIAL USE ONLY**
